

JANE KOZUCH

SENIOR SOLUTIONS ARCHITECT

Jane has devoted over 28 years focused on financial systems, 26 in a consulting capacity related to Hyperion consolidations products and similar EPM tools such as OneStream, Host Analytics, and Tagetik. Working first in accounting, then in financial systems, and finally, in consulting, she has gone through an extensive number of implementations. She has multiple-project experience in designing, implementing, troubleshooting, and improving OneStream. Much of her design and implementation experience has been with companies that have a global presence, requiring her to ensure that systems and processes are robust enough to meet the different requirements each region and business face. As an experienced systems designer and implementer, Jane also understands the challenges of satisfying demanding customers with limited resources, and how to leverage technology and best practices to maximize existing investments.
